

Sickness and Illness

At the Nest we promote the good health of all children attending including oral health by:

- Asking parents to keep children at home if they are unwell. If a child is unwell, it is in their best interest to be in a home environment rather than at nursery with their peers.
- Asking staff and other visitors not to attend the setting if they are unwell
- Helping children to keep healthy by providing balanced and nutritious snacks, meals and drinks
- Minimising infection through our rigorous cleaning and hand washing processes (**see infection control policy**) Ensuring children have regular access to the outdoors and having good ventilation inside
- Sharing information with parents about the importance of the vaccination programme for young children to help protect them and the wider society from communicable diseases
- Sharing information from the Department of Health that all children aged 6 months – 5 years should take a daily vitamin
- Having areas for rest and sleep, where required and sharing information about the importance of sleep and how many hours young children should be having.

Our procedures

To take appropriate action of children who become ill and to minimise the spread of infection we implement the following procedures:

- If a child becomes ill during the nursery day, we contact their parent(s) and ask them to pick up their child as soon as possible. During this time, we care for the child in a quiet, calm area with their key person, wherever possible
- We follow the guidance given to us by **UK Health Security Agency for managing specific infectious diseases** in Guidance on Infection Control in Schools and other Child Care Settings and advice from our local health protection unit on exclusion times for specific illnesses, e.g. sickness and diarrhoea, measles and chicken pox, to protect other children in the nursery¹
- Should a child have an infectious disease, such as sickness and diarrhoea, they must not return to nursery until they have been clear for at least 48 hours. We notify Ofsted as soon as possible and in all cases within 14 days of the incident where we have any child or staff member with food poisoning. We inform all parents if there is a contagious infection identified in the nursery, to enable them to spot the early signs of this illness. We thoroughly clean and sterilise all equipment and resources that may have come into contact with a contagious child to reduce the spread of infection
- We exclude all children on antibiotics for the first 48 hours of the course (unless this is part of an ongoing care plan to treat individual medical conditions e.g. asthma and the child is not unwell) This is because it is important that children are not subjected to the rigours of the nursery day, which requires socialising with other children and being part of a group setting, when they have first become ill and require a course of antibiotics
- We have the right to refuse admission to a child who is unwell. This decision will be taken by the manager on duty and is non-negotiable
- We make information about head lice readily available and all parents are requested to regularly check their children's hair. If a parent finds that their child has head lice we would

¹ <https://www.gov.uk/government/publications/health-protection-in-schools-and-other-childcare-facilities>

be grateful if they could inform the nursery so that other parents can be alerted to check their child's hair.

Whilst the child is awaiting collection they will be moved, if possible, to a room where they can be isolated behind a closed door, depending on the age of the child, and with appropriate adult supervision (ensuring safeguarding and PPE procedures are met.)

Ideally, a window will be opened for ventilation. Where it is not possible to isolate them, they will be moved to an area which is at least two metres away from other people.

They will be comforted and reassured whilst waiting for collection, as per our usual policy.

If they need to go to the bathroom while waiting to be collected, they will use a separate bathroom if possible. The bathroom will be cleaned and disinfected, using standard cleaning products, before being used by anyone else.

PPE will be worn by staff caring for the child while they await collection if a distance of two metres cannot be maintained (such as for a very young child or a child with complex needs.)

Cleaning the affected area with normal household disinfectant after someone with symptoms has left, will reduce the risk of passing the infection on to other people. Further information about cleaning the room used for isolation can be found at

<https://www.gov.uk/government/publications/covid-19-decontamination-in-non-healthcare-settings>

When a child, young person or staff member develops symptoms compatible with coronavirus, they will be sent home and advised to self-isolate for 10 days. All staff and students who are attending an education or childcare setting will have access to a test if they display symptoms of coronavirus and are encouraged to get tested in this scenario.

Where the child or staff member tests negative, they can return to their setting and the fellow household members can end their self-isolation.

Where the child, young person or staff member tests positive, the rest of their nursery group should be sent home and advised to self-isolate for 10 days. The other household members of that group do not need to self-isolate unless the child, young person or staff member they live with in that group subsequently develops symptoms.

Meningitis procedure

If a parent informs the nursery that their child has meningitis, the nursery manager will contact the Infection Control (IC) Nurse for their area. The IC Nurse will give guidance and support in each individual case. If parents do not inform the nursery, we will be contacted directly by the IC Nurse and the appropriate support will be given. We will follow all guidance given and notify any of the appropriate authorities including Ofsted if necessary.

Transporting children to hospital procedure

The nursery manager/staff member must:

- Inform the Directors immediately

- Call 999 for an ambulance immediately if the illness is severe. DO NOT attempt to transport the unwell child in your own vehicle
- Follow the instructions from the 999-call handler
- Whilst waiting for the ambulance, a member of staff must contact the parent(s) and arrange to meet them at the hospital
- Redeploy staff if necessary to ensure there is adequate staff deployment to care for the remaining children. This may mean temporarily grouping the children together
- Arrange for the most appropriate member of staff to accompany the child taking with them any relevant information such as registration forms, relevant medication sheets, medication and the child's comforter
- Always remain calm. Children who witness an incident may well be affected by it and may need lots of cuddles and reassurance. Staff may also require additional support following the accident.
